E-LEARNING PLATFORM

- E-learning is defined as learning which takes place on any publicly available web-based platform.

WHAT IS MOODLE

- Moodle is a free, online, open source course management system used in an increasing number of universities to conduct online and blended courses as well as to enhance traditional classroom courses.

MOODLE USES

There are many ways to use Moodle:

- ◉ Moodle has features that allow it to scale to very large deployments and hundreds of thousands of students, yet it can also be used for a primary school or an education hobbyist.
- ◉ Many institutions use it as their platform to conduct fully online courses, while some use it simply to augment face-to-face courses (known as blended learning).
- ◉ Many of our users love to use the activity modules (such as forums, databases and wikis) to build richly collaborative communities of learning around their subject matter (in the social constructionist tradition), while others prefer to use Moodle as a way to deliver content to students (such as standard SCORM packages) and assess learning using assignments or quizzes.

WHAT IS AGRIMOODLE

- ◉ The agriMoodle e-learning platform is based on Moodle (<http://moodle.org>).

TYPES OF USERS ON THE AGRIMOODLE PLATFORM

- **Guests** - Guests can view courses but cannot participate.
- **Students** - Students can access and participate in courses.
- **Non-editing teacher** - Non editing teachers can grade in courses but have not the right to edit them.
- **Editing teacher** - Editing teachers can manage and add content to courses. Teachers can do anything within a course, including changing the activities and grading students.
- **Course creator** - A user assigned the role of Course creator may create courses, be assigned the role of teacher for these courses (or not, if preferred) and view hidden courses.
- **Administrator** - Administrators can "do everything" on the site. Site administrators have permissions to do anything. Users may be assigned the role of site administrator by another site administrator in Settings > Site administration > Users > Permissions > Site administrators, but the role itself cannot be edited (or deleted!).
